Single**

Personal Information

My name is Bart Pollé.

I graduated in Art and Technology at the Utrecht School of the Arts. During this study I specialized myself in Digital Video Design. My passion goes with three different aspects: graphic design, video and technology. Through my studies, free projects, experiments and assignments I have developed myself in these three aspects. Motion graphics has all of these three aspects and I'm glad to say that since September 2008 I'm working as freelance motion graphics designer.

In my spare time I keep busy with outdoor activities. I regularly go mountain biking and camping. Friends, family, movies and music are very important for me. I like to listen to electro, rock and jazz. During my spare time I also often involved in design and technology.

I am interested in new gadgets and I like to be informed of the latest developments. I also like to explore foreign countries, cities, cultures and eating. In short I am a bon vivant who loves to explore!

Have not seen enough? I could arrange a portfolio presentation to inform you about my previous work, specializations and myself. I'm always open for questions or comments, so do not hesitate to contact me any time!
